Developer advocate, with a versatile software engineering skill set, that is dedicated and excels at resolving employer challenges a commit at a time with process improvements and innovative solutions that are proven to increase efficiency, customer satisfaction and company standards.

TECHNICAL SKILLS

HTML, CSS, Javascript, Git, Python, Github	Node.js, React.js, Angular.js, Tailwind Bootstrap	MongoDB, API's, AWS, SQL

EXPERIENCE

Software Engineer AminInc1   **January 2022 - Present**
Berlin, Germany

- ☐ Developed an appointment automation for students to save them lots of time in booking an appointment for residence permit extension.
- ☐ Built responsive websites for my Clients used by hundreds of people for effective business conduction.
- ☐ Built my portfolio website and deployed it.
- ☐ Finished a over 100+ coding challenges (Leetcode.com, HackerRank.com & Codewars.com)

WeAreDevelopers world congress - Volunteer   **June 2022 - July 2022**
Berlin, Germany

- ☐ Led the team to gather audible and videotapes of the entire training of more than 40,000 participants/developers for the world congress hosted in berlin.
- ☐ Collected data from participants to help in building solution oriented programs for problems encountered during the congress.

Apps :

- ☐ Amazon-clone - Fullstack Application - An interactive Amazon clone website. You can add to cart and checkout to make an order, add and remove items, select the quantity of a specific product/products.
- ☐ A portfolio website - A dynamic website that allows me to update my projects and expertise.
- ☐ Movie Search - A movie search app that allows people and movie lovers to search their favourite movies by the use of API.
- ☐ Rock Paper Scissors and a tic tac toe game using react.

EDUCATION

Humboldt Universität zu Berlin, Berlin, Deutschland.
University for Development Studies.
Majoring in Natural Resource management and specialised in GIS (Geographic Information System)

I have an insatiable and unquenchable passion for solving problems. This passion of mine led me to software engineering predominantly for solving problems. I may not be the best problem solver but I won't stop at anything to solve a problem. This passion has led me to developing an automated program for students and my colleagues for booking an appointment to get their residence permits extended with ease as it saves a lot of time.

I am eager to bring my technical skills and my unquenchable desire to your team, but most of all, balance insights and data with creativity and intuition to create unique differentiated ways to connect and grow your developer community and also the curiosity to learn, improve and get better.

Thank you for considering my application and I look forward to discussing how my passion, technical skills and curiosity to learn can contribute to your success.

Sincerely,

Amin Iddrisu
